

Guide for Candy Crush Saga

Introduction

Candy Crush Saga has been dominating the internet gaming arena and it is also one of the best Face book games. It is a block remover puzzle type of game developed by King. It is a very challenging block remover game as well. The early levels are extremely easy, but once you get to level 50+, the game start getting harder. It will require you to think and move wisely for you to pass the stage challenges.

In Candy Crush you have to go through levels and the sweet theme of candy is seen in each one. You join up with characters known as Tiffi and Mr. Toffee and go on a sweet candy adventure. You have over 300 levels available where you have to switch and match up pieces of candy together in order to progress into the game. Other features in the game include amazing graphics that seem quite tasty, plenty of items that you can unlock, and boosters that can help with those hard levels. You can also challenge your friends and set up leader boards that can keep track of all scores.

The game might seem easy and fun but to truly master it is quite the challenge. However that is what the fun is all about in the end. Now if you have already started your candy adventure you might want to get a few tips on making your gaming experience a fun one.

Top 10 Candy Crush Saga Tips & Hints & Cheats

Tip 1 – Find the patterns

There are things that will make a sprinkle donut hole or special candy effortlessly. Recognizing and repeating them allows you to wipe the board and earn your ticket to the next level faster. When starting a new game, and before making any moves, concentrate on your board, look for patterns, and see if it looks good to you. If it doesn't, exit the game before making any moves and start the game again. This way no lives will be used and you can get a brand new board. Hopefully this time you'll have better chance of seeing a pattern. Be warned this trick will not work if it's a time trial game. Sense it's a time trail, the game has already started as the time wines down.

Getting Infinite. Lives on Facebook. As a person who loves to multitask, I found this little trick out while have multiple browsers open. As everyone may know, Candy Crush only gives you 5 lives, and after losing all your lives, you'll have to wait 30 min to gain 1 life back. You can already see how frustrating that can be, even more frustrating when you have a hard board on your hands. Now, to get infinite lives on Facebook. Open up your browser and open up The Candy Crush game in multiple Tabs of your browser. You can see an example down below in my screen shots. You'll have 5 lives for every Browser you have open. Now you'll never have to wait ever again.

Time Challenge levels gets pretty tough as you advance through the levels. The best way to beat Time Challenge levels is to get as many +5 candy as possible. And knowing what causes the +5 candy to drop is the key in beating the Time Challenge. The +5 Candy don't just drop randomly, but are dropped when a cascaded of 4 or more combos are put together. The best way to go about doing this is trying to start breaking the candies from the bottom up. When breaking the candies from the bottom up, you have more room for candies to drop, by doing so; you'll have a better chance of getting other 4 cascaded candies or combos. Use this method to beat all the Time Challenge levels.

Stripped (Candy Crush Saga Tips)

Striped Candies, use them wisely, don't just waste them. Once you have acquired one you can combo them with another Striped candy or with a candy wrapper. So look at the board first, wait till you see where it would benefit you most. Having this skill is very important in advancing to the next level, because there will be levels that require you to use only Striped candies to advance.

Fish Candies, try to save them for last. They will zone in on hard to get jellies, and they will also get the jellies under the frosting blocks without needing to break the frosting. Making it faster in passing the level.

Tip 2 – Make use of the power of candies combo

Resist the urge to unleash the power candy as and when you have one. Wait for more to appear as swapping power candies with each other will release different kind of effects, you have to try to mix and match as you play along to find out which power candy will unleash which effect when swapped with another power candy.

I particularly like swapping the rainbow sprinkle with any power candy, especially rainbow sprinkle + pink crusted doughnuts combination.

Of course, rainbow sprinkle + rainbow sprinkle helps to clear every candy on the board (but not jellies which requires two blasts to clear)

some other good combinations to bear in mind when you have the chance to unleash :-

Pink doughnuts + jelly fishes

Striped candy + wrapped candy

Tip 3 – Completing the level in minimal moves may not net you higher scores

If you are playing for high scores, if you are near to completing the level, you might want to drag the game a few more moves (if you have plenty of moves left unused) to create a few more power candies. When you finally make the finishing move, the game will unleash the remaining power candies on the board one by one and then create a power candy or jelly fish for each unused move left. Depending on the number of moves left, sometimes having too many moves left may not get you a good final score as when it comes to the final hurrah, some of the power candy effects may neutralize each other, thus preventing you from maximizing your score. This is true if you have more than 10 moves left.

To earn extra points after you have cleared a Candy Crush level, is done by finishing the level with extra moves left over. You'll see a school of jelly fish or stripped candy clear parts of the Candy on the board. Finish a Candy Crush level with extra moves left over will help ensure you advance to the next level when one of the critical is certain amount of high score.

2. You can get extra moves by getting a pink bow from a friend. You'll know if you have a pink bow if your level that you are starting has a pink bow on it. The 3 extra moves will be automatically added on a mobile device when the game starts. It's a bit different on Facebook, you'll have to click on the +3 moves in the starting screen to activate it.

3. Combos are one of the main Keys in clearing a Candy Crush board. The two best Combo combinations are wrapped candy and the stripped candy together. Those two together will clear a very large area of the board. The other best combination is the sprinkle donut and a stripped candy. This will also clear a huge amount of the Candy Crush boards. Utilizing these two combinations correctly will help you reach the jellies that are hard to get to or are off the board.

4. Make sure to have a plan when starting a board, access your threats. Look at what

you should prioritize first. For example I would take out the bombs, chocolate and blocks first if I see them on the board. And with Jellies, I would only worry about the jellies on the edge. They have the lowest number of combinations to get rid of them.

5. Extra lives, if you read our other Daily 5 Candy Crush Tips, We showed you a way to get infinite lives by using multiple browsers. This time you can get extra lives on your mobile device by turning your clock ahead 2 hours. You just keep doing this to keep on play so you don't have to wait 30 min to get a new life.

Tip 4 – Clear chocolate squares

Chocolate squares will regenerate if you do not clear them and they can be a stumbling block if they are allowed to multiply and grow. If you are able to clear the board of all chocolate squares, they will not reappear anymore, allowing you to plan your moves in peace. However, in certain levels as you advance further, chocolate squares will regenerate no matter what, hence you still need to clear them promptly to fill your boards with as many candies as possible – more candies means more permutations to swap your candies.

Know your Chocolate, when you see a chocolate on your board try to clear them first. If you don't they'll regenerate one each round. To make sure that this doesn't happen. Try to destroy a chocolate piece each round. By doing so, the chocolate will not regenerate itself. When the chocolate regenerates, they will cover the possible candy on the board, stopping you from getting a cascade of candies. One good thing about chocolates, they will not cover up any special candies.

When dealing with ingredients, you don't want to start the Candy Crush level if you see any of the ingredients on the far left or right of the board. You would want them to be near the middle. When they are on the side, you have fewer chances to get a set of candies or more. When you see this when start a level, you should just exit the game and restart the board. This way you'll save your lives.

Understanding how Striped Candies work will greatly help you clear hard Candy Crush levels. If stripes are horizontal, they will clear all candies on that horizontal line. If they are vertical, they will clear all candies in that vertical line. The way the candies are striped is determined by the why you swiped to create it. If your move was vertical, your candy strip will be vertical. And it works the same way as the horizontal one. Knowing and planning you want the candy to be striped will help you out tremendously

Color Bombs or Sprinkled Donuts, if you can find a way to put them together, it will clear the entire Candy Crush Board. Giving you massive amount of points. It's really rare to get one, but when you do. You'll feel like doing fifty flips in the air.

5. Don't waste your turns. Just because you see 50 Moves left on your move indicator, doesn't mean you can move whatever you want. All moves needs to have purpose. Scan the board, try to think 3 or 4 moves ahead.

Tip 5 – Clear time bombs

Don't wait. Clear them once you have the chance. If not, you will waste your effort if one of them explodes as it means the end of the game.

Tip 6 – Study the board and plan your moves

Most of the stages are limited moves based instead of time based. Hence you have all the time in the world to consider your moves. Play them carefully. When playing levels which requires you to cascade the cherries and hazelnuts, you need to study where are the exit points at the bottom of the board and how the cascade flows so that you do not waste moves matching candies which will not bring your cherries and hazelnuts nearer to the exit at all!

Tip 7 – Use striped candies to clear out of reach tiles

Some levels require you to clear the jelly from out of reach tiles. Play your striped candies carefully, dropping them to the horizontal or vertical level in line with these out of reach places, then match them. In some instances, this could be the only way to clear these tiles, i.e. using power combos or moves.

Tip 8 – Clear liquorices and locked candies as early as possible

Use striped combos to clear rows of locked candies quickly. Clearing them will allow more candies to cascade down, otherwise your moves are limited because locked candies don't get out of the way – they simply stay put until you unlock them by matching them in a row. Hence, clearing them will free you up and give you greater freedom and more movement choices.

Tip 9 – +5 Moves can help boost your final scores

If you have decided to spend money on Candy Crush Saga like no tomorrow, knowing that you are just a move away from finishing the level, buy a +5 move power up so that you have 5 added moves to your remaining moves. This will give you 5 additional power candies for the finale, helping you to score even more points at the last hurrah.

Tip 10 [Spoiler Alert] – Cheat with a jail broken iPhone

This is more of a cheat than a tip and therefore I will not elaborate into it too much. Therefore please read the following disclaimer....

Disclaimer: Use it at your own discretion. You are aware that you shall be fully responsible for your own actions.

- 1) If you just want to finish up the levels as fast as possible without regards to fair play whatsoever
- 2) You are lucky enough to have a jail brokeniPhone
- 3) Go Google on IAP Free and find out how to install it on your jail brokeniPhone
- 4) Play with free unlimited power ups and cheat your way to bragging rights in Candy Crush Saga

Candy Crush Game Tips, Hints and Cheats – Know More about Candy Boosters

All booster are different, they do very different things and are not available in each level. Certain levels will come with free booster and some that you'll have to earn. Below is a list of the boosters you can find on Candy Crush.

How to use Lollipop Booster

This lollipop booster is the first booster you'll receive as you start your journey through the candy crush game. You'll see this booster starting at the 6th level. It is used to break anything, but it can only break the first level of a candy. For example if you are breaking a candy that has a jelly, you'll only break one layer of the jelly. So use it at the end.

How to use Jelly Fish Booster

Jelly Fish comes at level 8, and is very useful when you are down to the last jellies and can seem to get to them. The fish will smash jellies of the same color.

How to use Color Bomb Booster

The color bomb booster will start to appear starting at the 12th level of the game. When using this booster you can change the colors of the candies on the board to a color bomb.

How to use the Coconut Wheel

This booster will appear after level 14. It is use to swap candies around to make a match. This booster is somewhat hard to use, you'll need to experiment with it.

How to use Extra time boosters

After level 26. You can use the extra time booster. This booster will give you an extra 15 seconds if you need it to beat a certain live, like you need more points.

How to use Sweet Tooth Booster

This Sweet Tooth Booster will eat through any one layer of candy. So careful when you decide to use this booster. You can also get this booster from their online store for 99 cents and can be used 3 times.

How to use Shuffle Candy

You'll see this booster appear after level 30. When activating this booster, you'll shuffle the current game board. This is a nice way of giving you a fresh board, and also comes in handy when you are stuck.

How to use the Striped and Wrapped Booster

You can use this booster after the 34th level. When this booster is used you'll get a striped and a wrapped candy the beginning of the level.

How to use the Bomb Cooler Booster

This Booster comes after the 98th level, and this booster will add 5 points to each visible bomb. A good booster when you are almost out of time.

How to use the Charm of Life

The Charm of life will add 3 lives to the currently level you are playing. If you need to know how to get more lives without using this booster check our other tips here.

How to use the Striped Booster

With this Booster, you'll start the board that you are currently on with Striped Candy.

How to use Mystery Candy Booster

You'll unlock this booster at level 130. You can this when you see this booster on the board that is pink in color. If you are able to smash it you'll get a helpful candy from it.

How to use Bubblegum Troll Booster

After getting to level 156, you will unlock the Bubblegum Troll Booster, when using this booster you'll chocolate from moving for 5 moves, this will help you finish the board easier.

Happy Crushing!!!
